2.3.7 - Teaching learning process nurtures creativity, innovativeness, intellectual and thinking skills, empathy, life skills etc. among students

Teachers believe creativity is valuable skill for students future Create meaningful assignments that allow students to play to their strengths No two people are the same, and therefore no two students should need to learn in an identical way. Create tasks that play to the unique strengths of each student – whether it's a topic they're interested in or through the format or approach, it's easier to encourage genuine creativity when you can create interest and engagement in the challenge. Every subject can be creative! Creativity doesn't mean the entire curriculum needs to be rewritten, instead, it could be something as simple as using

clay to create shapes or playing word In II year of Bed our students chose individual topic related to teaching learning process and make a short research under the guidance of Teacher . in this process every student develop thinking skill.
